2. Rates and Charges (Continued)

1. International Clearline Service Descriptions (Continued)

2. Domestic Portion of International Clearline Services

Each International Clearline Service circuit connected between two customer interface points will be construed as an individual circuit for rate compilation purposes. International Clearline Service Pricing Plan rates do not provide for special or diverse circuit routing. Sprint's International Clearline Service rates for the domestic portion of an International Clearline circuit (i.e., from the customer location to the International Gateway City) are listed in Section 3.2.

To calculate the monthly charge for the domestic portion of an International Clearline circuit between a U.S. location and an international location, multiply the monthly charge per mile times the total number of Vertical and Horizontal (V&H) miles between the initial point-of-presence the customer connects to and the International Gateway City. The monthly charges per mile are determined by the distance between the closest Sprint point-of-presence to the customer location and the International Gateway City, and are obtained from the appropriate mileage band listed in Section 3.2. Next, add the monthly fixed charge per circuit (domestic portion), determined in the same manner based on mileage bands, and add the monthly fixed charge for the international half-circuit linking the landing sites in the two countries. The calculation of V&H miles is defined in Section 2.19.

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

1. International Clearline Service Descriptions (Continued)

2. Domestic Portion of International Clearline Service (Continued)

Additional charges will be applied for International Clearline Services beyond the gateway location in the foreign country by the carrier(s) that provide(s) the circuit to the final destination.

The Clearline Digital Data Service (56 Kbps) Pricing Plan rewards extended term International Clearline Digital Data Service (56 Kbps) customers with discounts based on the length of commitment (1-, 3-, or 5-Year terms).

International Clearline Services will not contribute to the Clearline Volume Pricing Plan for International Clearline 1.5 Services. Likewise, International Clearline Services will not contribute to the Clearline Volume Pricing Plan for domestic Clearline 1.5 Service.

1. International Clearline Digital Data Service (56 Kbps)

Sprint's International Clearline Digital Data Service (56 Kbps) rates for the domestic portion of an International Clearline Digital Data Service (56 Kbps) circuit (i.e., from the customer location to the International Gateway City) are listed in Section 3.2.4.

2. International Clearline Clear Channel Service (64 Kbps)

Sprint's International Clearline Clear Channel Service (64 Kbps) rates for the domestic portion of an International Clearline Clear Channel Service (64 Kbps) circuit (i.e., from the customer location to the International Gateway City) are listed below.

4. INTERNATIONAL CLEARLINE SERVICES (Continued)2. Rates and Charges (Continued)1. International Clearline Service Descriptions (Continued)2. Domestic Portion of International Clearline Service (Continued)2. International Clearline Clear Channel Service (64 Kbps)

3. International Clearline Fractional 1.5 Service (Nx64Kbps)

Sprint's International Clearline Fractional 1.5 Service (Nx64 Kbps) rates for the domestic portion of an International Clearline Fractional 1.5 Service (Nx64 Kbps) circuit (i.e., from the customer location to the International Gateway City) are listed in Section 3.2.2.

---

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

1. International Clearline Service Descriptions (Continued)

2. Domestic Portion of International Clearline Service (Continued)

4. International Clearline 1.5 Service

Sprint's International Clearline 1.5 Service rates for the domestic portion of an International Clearline 1.5 Service circuit (i.e., from the customer location to the U.S. Gateway City) are listed in the Domestic Clearline 1.5 Service in Section 3.2.1.

The Clearline Volume Pricing Plan rewards extended term International Clearline 1.5 Service customers for large volume monthly usage.

The International Clearline 1.5 basic service pricing (i.e., domestic private line charges and charges for the connection between the New York City and U.K. gateways) will count towards the determination of the customer's level of usage of International Clearline 1.5 Service. The total of these charges for all the customer's circuits (International and Canadian Clearline 1.5) will determine whether the customer is eligible for Clearline Volume Pricing Plan rates and the rate category that is appropriate.

If the total usage (Monthly Intercity Circuit Charges plus the Monthly Half Circuit Charges for connection between the New York City and U.K. gateways) for International Clearline 1.5 service is great enough to be eligible for the Clearline Volume Pricing Plan (Section 3.2.1.2.B), the domestic portion of each International Clearline 1.5 circuit will then be priced again at the applicable Clearline Volume Pricing Plan rates according to the term of commitment. The discounted domestic charge will then be summed with the international half-circuit charge for the total International Clearline 1.5 monthly charge.

---

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

1. International Clearline Service Descriptions (Continued)

2. Domestic Portion of International Clearline Service (Continued)

4. International Clearline 1.5 Service (Continued)

Only International Clearline 1.5 Services are combined to determine the overall level of the Clearline Volume Pricing Plan. Domestic Clearline 1.5 Service between points within the United States will not contribute to the Clearline Volume Pricing Plan for International Clearline 1.5 Service. Likewise, International Clearline 1.5 Services will not contribute to the Clearline Volume Pricing Plan for domestic Clearline 1.5 Service.

3. Local Access Facilities

Charges for the local access facilities for International Clearline Services are provided under Sprint Schedule No.8 as described in the Domestic Clearline Service Section 3.2.5.

4. Special Access Facilities

Special access for connection of International Clearline 2.0 Service can be arranged through Sprint on an individual case basis.

---

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

2. Canadian/Mexican Clearline Services

1. Canadian/Mexican Clearline Digital Data Service (56 Kbps)

Sprint's Canadian/Mexican Clearline Digital Data Service (56 Kbps) is provided under the pricing structure described below. Reduced rates are offered based upon total Monthly Charges per Circuit and the length of customer commitment. The two components of Canadian/Mexican Clearline Digital Data Service (56 Kbps) are the domestic private line facilities and the local access facilities.

1. Domestic Portion of Canadian/Mexican Clearline Digital Data Service (56 Kbps)

Each Canadian/Mexican Clearline Digital Data Service (56 Kbps) circuit connected between two customer interface points will be construed as an individual circuit for rate compilation purposes. The Canadian/Mexican Clearline Digital Data Service (56 Kbps) Pricing Plan rates do not provide for special or diverse circuit routing. Sprint's Clearline rates for the United States portion of a Canadian/Mexican private line circuit are listed in Section 3.2.4.

To calculate the monthly charge for a Canadian/Mexican Clearline Digital Data Service (56 Kbps) circuit under Clearline Digital Data Service (56 Kbps) pricing between a U.S. and Canadian or Mexican city-pair, multiply the monthly charge per mile times the total number of Vertical and Horizontal (V&H) miles between the initial point-of-presence to which the customer connects to in the U.S. and the Canadian or Mexican border crossing point. The monthly charges per mile are determined by the distance between the initial point-of-presence the customer connects to in the U.S. and the Canadian or Mexican border crossing point; a monthly fixed charge per circuit is added to this monthly variable charge to determine the total monthly recurring charges per circuit. The calculation of V&H miles is defined in Section 2.14.

---

2. Canadian/Mexican Clearline Services

1. Canadian/Mexican Clearline Digital Data Service (56 Kbps)

1. Domestic Portion of Canadian/Mexican Clearline Digital Data Service (56 Kbps)

Additional charges will be applied for Canadian/Mexican Clearline Digital Data Service (56 Kbps) beyond the border crossing point by the carrier(s) that provide(s) the circuit to the final destination. The Canadian border crossing points to be used for computation purposes are: Blaine, Washington; West Sweetgrass, Montana; Crosby, North Dakota; Neche, North Dakota; Pigeon River, Minnesota; Port Huron, Michigan; Detroit, Michigan; Buffalo, New York; Mooers Fork, New York; and Calais, Maine.

The Mexican border crossing points to be used for computation purposes are: El Paso, TX; Nogales, AZ; San Ysidro, CA; and McAllen, TX.

The Clearline Digital Data Service (56 Kbps) Pricing Plan rewards extended term Canadian/Mexican Clearline Digital Data Service (56 Kbps) customers with discounts based on the length of commitment (1-, 3-, or 5-Year terms).

Canadian/Mexican Clearline Digital Data Service (56 Kbps) will not contribute to the Clearline Volume Pricing Plan for Canadian/Mexican Clearline 1.5 Services. Likewise, Canadian/Mexican Clearline Digital Data Service (56 Kbps) will not contribute to the Clearline Volume Pricing Plan for domestic Clearline 1.5 Service.

2. Local Access Facilities

Charges for the local access facilities are provided under Sprint Schedule No. 8 as described in the Domestic Clearline Services Section 3.2.5 herein.

---

2. Rates and Charges (Continued)

2. Canadian/Mexican Clearline Services (Continued)

2. Canadian/Mexican Clearline Clear Channel Service (64 Kbps)

Sprint's Canadian/Mexican Clearline Clear Channel Service (64 Kbps) is provided under the pricing structure described below. Reduced rates are offered based upon total Monthly Charges per Circuit and the length of customer commitment. The two components of Canadian/Mexican Clearline Clear Channel Service (64 Kbps) are the domestic private line facilities and the local access facilities.

1. Domestic Portion of Canadian/Mexican Clearline Clear Channel Service (64 Kbps)

Each Canadian/Mexican Clearline Clear Channel Service (64 Kbps) circuit connected between two customer interface points will be construed as an individual circuit for rate compilation purposes. The Canadian/Mexican Clearline Clear Channel Service (64 Kbps) Pricing Plan rates do not provide for special or diverse routing. Sprint's Clearline rates for the United States' portion of a Canadian or Mexican private line circuit are listed in Section 3.2.4 under Clearline Digital Data Service Circuit Charges.

To calculate the monthly charge for a Canadian/Mexican Clearline Clear Channel Service (64 Kbps) pricing between a U.S. and Canadian or Mexican city-pair, multiply the monthly charge per mile times the total number of Vertical and Horizontal (V&H) miles between the initial point of presence to which the customer connects to in the U.S. and the Canadian or Mexican border crossing point. The monthly charges per mile are determined by the distance between the initial point of presence the customer connects to in the U.S. and the Canadian or Mexican border crossing point; a monthly fixed charge per circuit is added to this monthly variable charge to determine the total monthly charges per circuit. The calculation of V&H miles is defined in Section 2.20.

Additional charges will be applied for Canadian/Mexican Clearline Clear Channel Service (64 Kbps) beyond the border crossing point by the carrier(s) that provide(s) the circuit to the final destination. The Canadian border crossing points to

2. Rates and Charges (Continued)

2. Canadian/Mexican Clearline Services (Continued)

3. Canadian/Mexican Clearline 1.5 Service

Sprint's Canadian/Mexican Clearline 1.5 Service is provided under the pricing structure described below. Reduced rates are offered based upon total Monthly Charges per Circuit and the length of customer commitment. The two components of Canadian/Mexican Clearline 1.5 Service are the domestic private line facilities and the local access facilities.

1. Domestic Portion of Canadian/Mexican Clearline 1.5 Service

1. Base Service pricing is used initially to calculate all Sprint Clearline 1.5 Service customers' bills

Each Canadian/Mexican Clearline 1.5 circuit connected between two customer interface points will be construed as an individual circuit for rate compilation purposes. Clearline Base and Volume Pricing Plan rates do not provide for special or diverse circuit routing. Sprint's Clearline 1.5 rates for the United States portion of a Canadian or Mexican private line circuit are listed in Section 3.2.1.

To calculate the monthly charge for a Canadian/Mexican Clearline 1.5 circuit under Base Service Pricing between a U.S. and Canadian or Mexican city-pair, multiply the monthly charge per mile times the total number of Vertical and Horizontal (V&H) miles between the initial point-of-presence to which the customer connects to in the U.S. and the Canadian or Mexican border crossing point. The monthly charges per mile are determined by the distance between the initial point-of-presence the customer connects to in the U.S. and the Canadian or Mexican border crossing point; a monthly fixed charge per circuit is added to this monthly variable charge to determine the total monthly recurring charges per circuit. The calculation of V&H miles is defined in Section 2.20.

3. Offshore Clearline Services

Offshore Clearline Services consist of Offshore Clearline Digital Data Service, Offshore Clearline Clear Channel (64 Kbps), Fractional 1.5 (Nx64/NX56), Fractional 2.0 (1.024 Mbps), 1.5 and 2.0 (E-1) services.

Offshore Clearline Services are priced between the U.S. Gateway Cities and the Offshore U.S. Gateway Cities. The continental U.S. Gateway Cities are: Atlanta, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Houston, Kansas City, Los Angeles, Memphis, Miami, Minneapolis, Newark, New York, Philadelphia, Phoenix, Pittsburgh, Sacramento, San Diego, San Francisco, San Jose, Seattle, St. Louis, Washington, D.C., and White Plains. The offshore U.S. Gateway Cities are: Honolulu, Hawaii; San Juan, Puerto Rico; and Tamuning, Guam.

The three components of Offshore Clearline Service rates are: (1) the offshore facilities; (2) the domestic extensions (Section 3.2.4); and (3) the local access facilities as provided for under Sprint Schedule No. 8 and described in Section 3.2.5 herein.

1. Offshore Digital Full-Circuit Rates

Sprint's Offshore Services monthly full-circuit rate for the connections between the continental U.S. Gateway and the offshore U.S. destination, and between two offshore U.S. destinations, are as follows:

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

3. Offshore Clearline Services (Continued)

2. Domestic Portion of Offshore Clearline Services

Each Offshore Clearline Service circuit connected between two customer interface points will be construed as an individual circuit for rate compilation purposes. Offshore Clearline Service Pricing Plan rates do not provide for special or diverse circuit routing. Sprint's Offshore Clearline Service rates for the domestic portion of an Offshore Clearline circuit (*i.e.*, from the customer location to the U.S. Gateway City) are listed in Section 3.2.

To calculate the monthly charge for the domestic portion of an Offshore Clearline circuit between a continental U.S. location and an offshore U.S. location, multiply the monthly charge per mile times the total number of Vertical and Horizontal (V&H) miles between the initial point-of-presence the customer connects to and the U.S. Gateway City in the continental U.S.

The monthly charges per mile are determined by the distance between the closest Sprint point-of-presence to the customer location and the U.S. Gateway City in the continental U.S., and are obtained from the appropriate mileage band listed in Section 3.2. Next, add the monthly fixed charge per circuit (domestic portion), determined in the same manner based on mileage bands, and add the monthly fixed charge for the offshore full-circuit linking the landing sites in the two locations. The calculation of V&H miles is defined in Section 2.19.

\*\* Effective September 1, 1998, the rates on this page are no longer available to new subscribers.

---

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

3. Offshore Clearline Services (Continued)

2. Domestic Portion of Offshore Clearline Services (Continued)

Additional charges will be applied for Offshore Clearline Services beyond the gateway location in the offshore U.S. location by the carrier(s) that provide(s) the circuit to the final destination.

The Clearline Digital Data Service Pricing Plan rewards extended term Offshore Clearline Digital Data Service customers with discounts based on the length of commitment (1-, 3-, or 5-Year terms).

Offshore Clearline Services will not contribute to the Clearline Volume Pricing Plan for Offshore Clearline 1.5 Services. Likewise, Offshore Clearline Services will not contribute to the Clearline Volume Pricing Plan for domestic Clearline 1.5 Service.

1. Offshore Clearline Voiceband Service

Sprint's Offshore Clearline Voiceband Service rates for the domestic portion of an Offshore Clearline Voiceband circuit (i.e., from the customer location to the U.S. Gateway City) are listed in Section 3.2.3.

2. Offshore Clearline Digital Data Service

Sprint's Offshore Clearline Digital Data Service rates for the domestic portion of an Offshore Clearline Digital Data Service circuit (i.e., from the customer location to the U.S. Gateway City) are listed in Section 3.2.4. This service is available at speeds of 2.4, 4.8, 9.6, 19.2 and 56 Kbps.

4. INTERNATIONAL CLEARLINE SERVICES (Continued)2. Rates and Charges (Continued)3. Offshore Clearline Services (Continued)2. Domestic Portion of Offshore Clearline Services (Continued)3. Offshore Clearline Clear Channel Service (64 Kbps)

Sprint's Offshore Clearline Clear Channel Service (64 Kbps) rates for the domestic portion of an Offshore Clearline Clear Channel Service (64 Kbps) circuit (i.e., from the customer location to the U.S. Gateway City) are listed below.

Monthly Recurring Charges

<u>Charge Per Term of Commitment</u>	<u>Circuit Fixed Charge Mileage</u>	<u>Intercity Per Circuit</u>	<u>Circuit Mile</u>
1-Year	0+	\$237.56	\$0.28

2. Rates and Charges (Continued)

3. Offshore Clearline Services (Continued)

2. Domestic Portion of Offshore Clearline Services (Continued)

4. Offshore Clearline Fractional 1.5 Service

Sprint's Offshore Clearline Fractional 1.5 Service (Nx64/NX56 Kbps) rates for the domestic portion of an Offshore Clearline Fractional 1.5 Service circuit (i.e., from the customer location to the U.S. Gateway City in the Continental United States) are listed in the Domestic Clearline Fractional 1.5 service in Sections 3.2.B.1 through 3.2.B.5. The domestic portion of Offshore Clearline Fractional (1.024 Mbps) service are the same as Sprint's Clearline 1.5 rates in Section 3.2.1.

---

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

3. Offshore Clearline Services (Continued)

2. Domestic Portion of Offshore Clearline Services (Continued)

5. Offshore Clearline 1.5 Service

Sprint's Offshore Clearline 1.5 Service rates for the domestic portion of an Offshore Clearline 1.5 Service circuit (i.e., from the customer location to the U.S. Gateway City) are listed in the Domestic Clearline 1.5 Service in Section 3.2.1.

The Clearline Volume Pricing Plan rewards extended term Offshore Clearline 1.5 Service customers for large volume monthly usage.

The Offshore Clearline 1.5 basic service pricing (i.e., domestic private line charges and charges for the connection between the Banded and U.S. gateways) will count towards the determination of the customer's level of usage of Offshore Clearline 1.5 Service. The total of these charges for all the customer's circuits (Offshore Clearline 1.5) will determine whether the customer is eligible for Clearline Volume Pricing Plan rates and the rate category that is appropriate.

If the total usage (Monthly Intercity Circuit Charges plus the Monthly Full Circuit Charges for connection between the banded and U.S. gateways) for Offshore Clearline 1.5 service is great enough to be eligible for the Clearline Volume Pricing Plan (Section 3.2.1.2.B), the domestic portion of each Offshore Clearline 1.5 circuit will then be priced again at the applicable Clearline Volume Pricing Plan rates according to the term of commitment. The discounted domestic charge will then be summed with the offshore full-circuit charge for the total Offshore Clearline 1.5 monthly charge.

---

4. INTERNATIONAL CLEARLINE SERVICES (Continued)

2. Rates and Charges (Continued)

3. Offshore Clearline Services (Continued)

2. Domestic Portion of Offshore Clearline Services (Continued)

5. Offshore Clearline 1.5 Service (Continued)

Only Offshore Clearline 1.5 Services are combined to determine the overall level of the Clearline Volume Pricing Plan. Domestic Clearline 1.5 Service between points within the United States will not contribute to the Clearline Volume Pricing Plan for Offshore Clearline 1.5 Service. Likewise, Offshore Clearline 1.5 Services will not contribute to the Clearline Volume Pricing Plan for domestic Clearline 1.5 Service.

3. Local Access Facilities

Charges for the local access facilities are provided under Sprint Schedule No. 8 as described in the Domestic Clearline Services Section 3.2.5 herein.

4. Special Access Facilities

Special access for connection of Offshore Clearline 2.0 Service can be arranged through Sprint on an individual case basis.

---

5. INTERNATIONAL PRIVATE LINE FULL CIRCUIT SERVICES

1. Description

International Private Line ("IPL") Full Circuit Service provides for two-way simultaneous transmission of digital signals at speeds up to 2.048 Mbps. Sprint's International Private Line Full Circuit Service is an international end-to-end private line service providing global customers additional support and services beyond traditional half circuit international private lines. Sprint's International Private Line Full Circuit Services are designed to meet the needs of customers with domestic or international origination to one or more international locations.

2. Services

The following IPL Full Circuit services are available:

- IPL Full Circuit Digital Data Services (DDS)
- IPL Full Circuit Fractional 1.5 (FT1).
- IPL Full Circuit 1.5 (DS1)
- IPL Full Circuit Fractional 2.0
- IPL Full Circuit 2.0 (E1)

International Private Line Full Circuit services consist of three components: (1) originating access; (2) the international facilities; and (3) terminating access.

3. Product Offerings

The following Sprint IPL Full Circuit product offerings are available. Service availability is defined in Section 5.4 below.

1. IPL Full Circuit Digital Data Services (DDS)

B Sprint's International Private Line B Full Circuit Digital Data Service (56/64 kbps) is a digital transmission service providing digital signals to overseas locations at the speed of 56/64 kbps. Local Digital Data Service (DDS) access facilities may be used to provide the customer with access to the international facilities.

---

5. INTERNATIONAL PRIVATE LINE FULL CIRCUIT SERVICES (Continued)

3. Product Offerings (Continued)

2. IPL Full Circuit Fractional 1.5 (FT1)

B Sprint's International Private Line B Full Circuit Fractional 1.5 Service (Nx64) is a digital transmission service providing digital signals to overseas locations at speeds of 128, 192, 256, 384, 512 and 768 kbps. Local access facilities may be used to provide the customer with access to the international facilities.

3. IPL Full Circuit 1.5 (DS1)

B Sprint's International Private Line B Full Circuit 1.5 Service is a digital transmission service providing digital signals to overseas locations at the speed of 1.544 Mbps. Local access facilities may be used to provide the customer with access to the international facilities.

4. IPL Full Circuit Fractional 2.0

B Sprint's International Private Line - Full Circuit Fractional 2.0 Service is a digital transmission service providing digital signals to overseas locations at the speed of 1.024 mbps (Fractional E-1). Local access facilities may be used to provide the customer with access to the international facilities.

5. IPL Full Circuit 2.0 (E1)

B Sprint's International Private Line B Full Circuit 2.0 Service is a digital transmission service providing digital signals to overseas locations at the speed of 2.048 Mbps (E-1). Local access facilities may be used to provide the customer with access to the international facilities.

---

5. INTERNATIONAL PRIVATE LINE FULL CIRCUIT SERVICES (Continued)

4. Service Availability

Sprint's International Private Line Full Circuit Service is available to the following foreign destinations via cable facilities:

Australia  
Belgium  
Hong Kong  
France  
Germany  
Ireland  
Italy  
Japan  
Netherlands  
Singapore  
Switzerland  
Taiwan  
United Kingdom

5. IPL Full Circuit Rates

To determine the monthly recurring charge associated with the full circuit ordered, first (1) locate the originating region of the U.S. (Section 5.5.1), (2) utilizing the Country Level Pricing Matrix in Section 5.5.2, locate the terminating international location and (3) find the pricing level indicated where steps (1) and (2) above meet. Then, in Section 5.5.3: (4) locate the full circuit speed, (5) locate the level determined by steps (1) through (3) and find the monthly recurring charge where (4) and (5) meet.

1. Originating Regions of the U.S

Full circuit international private line services may be available from the following regions of the U.S.

1. U.S. West: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

5. INTERNATIONAL PRIVATE LINE FULL CIRCUIT SERVICES (Continued)

6. PROMOTIONAL SERVICE OFFERINGS

From time-to-time, Sprint will provide promotional offerings to its subscribers. Such offerings will be limited to certain dates, times and locations. The specified terms and conditions of each promotional offering will be described below.

Promotional discounts are applied consecutively, beginning with a discount off the base rate and thereafter on the previously discounted rate.

1. [Reserved for Future Use]

6. PROMOTIONAL SERVICE OFFERINGS (Continued)2. Private Line IXC and Access Discounts Promotion

Sprint will offer a promotional discount to customers who subscribe to Canadian/Mexican Clearline 1.5, Canadian/Mexican Clearline Clear Channel, Canadian/Mexican Clearline Digital Data Services, Canadian/Mexican Clearline Fractional 1.5, Clearline 1.5, Clearline Fractional 1.5, Clearline 45, Clearline Digital Data Services, and Clearline Voiceband.

New Clearline customers must sign an agreement with a term of at least one year. Existing customers must add one or more Clearline private line circuit for at least one year.

The customer will receive the following discounts off their service's monthly recurring charge for the length of their Clearline term agreement:

<u>Clearline Product</u>	<u>1-Year Term Discounts</u>	<u>2-Year Term Discounts</u>	<u>3-Year Term Discounts</u>
Clearline Voiceband (64 kbps)	55%	55%	56%
Clearline Digital Data Service (56 kbps)	55%	55%	56%
Clearline Fractional 1.5	55%	55%	56%
Clearline 1.5	75%	74%	74%
Clearline 45	93%	94%	94%

In addition, the following access rates will apply:

<u>Clearline Product</u>	<u>Monthly Level</u>	<u>Monthly Charge</u>
Clearline 1.5 and Clearline Fractional 1.5	\$250-\$4,000	41% discount off normal rate
Clearline 45	\$1,500 - \$2,999	\$1,500
	\$3,000 - \$4,999	\$2,500
	\$5,000 - \$6,999	\$3,500
	\$7,000 - \$9,000	\$4,500
Clearline Voiceband (64 kbps) and Clearline Digital Data Service (56 kbps)	\$150-\$299	\$150
	\$300+	\$200

All of the customer's initial dedicated locations must be activated by September 30, 2005. This promotion may not be combined with any other promotions. A customer may subscribe to this promotion through June 30, 2005, unless the offering is sooner changed or cancelled by Sprint.

6. PROMOTIONAL SERVICE OFFERINGS (Continued)

3. [Reserved for Future Use]

6. PROMOTIONAL SERVICE OFFERINGS (Continued)

4. [Reserved for Future Use]

6. PROMOTIONAL SERVICE OFFERINGS5. Private Line IXC and Access Discounts Competitive Response Promotion III

Sprint will offer a promotional discount to customers who subscribe to Canadian/Mexican Clearline 1.5, Canadian/Mexican Clearline Clear Channel, Canadian/Mexican Clearline Digital Data Services, Canadian/Mexican Clearline Fractional 1.5, Clearline 1.5, Clearline Fractional 1.5, Clearline 45, Clearline Digital Data Services, and Clearline Voiceband.

This promotional will be offered in cases where Sprint believes an existing customer or prospective customer will accept a competitor's offer in the absence of further inducement from Sprint to subscribe to, or remain subscribed to, a Clearline service.

The customer will receive the following discounts off their service's monthly recurring charge for the length of their Clearline term agreement:

<u>Clearline Product</u>	<u>1-Year Term Discounts</u>	<u>2-Year or 3-Year Term Discounts</u>
Clearline 1.5	19%	18%
Clearline 45	24%	25%

  

<u>Clearline Product</u>	<u>1-Year or 2-Year Term Discounts</u>	<u>3-Year Term Discounts</u>
Clearline Digital Data Service (56 kbps)	21%	22%
Clearline Fractional 1.5	21%	22%
Clearline Voiceband (64 kbps)	21%	22%

All of the customer's initial dedicated locations must be activated by December 24, 2004. This promotion may not be combined with any other promotions. A customer may subscribe to this promotion through September 24, 2004, unless the offering is sooner changed or cancelled by Sprint.

---

7. DOMESTIC ISDN PRIMARY RATE INTERFACE (PRI)

1. General Description

Sprint's Integrated Services Digital Network (ISDN) provides end-to-end digital connectivity and out of band packet oriented signaling capability to its subscribers. The Primary Rate Interface (PRI) access provides the ANSI standard Primary Rate Interface on digital T-1 trunks to the following Sprint services: Ultra 800, Ultra WATS, Switched Digital Services and Virtual Private Network (VPN) services. Out of band signaling is provided via a 64 Kbps or 56 Kbps Data channel and is utilized to provide call set-up and tear-down functions for the PRI trunk group. One D channel may provide signaling for up to 479 Bearer (B) channels. This is possible due to the ISDN feature known as Non-Facility Associated Signalling (NFAS). A Back Up D Channel feature is available which provides the customer the capability of having a second D channel associated with a PRI trunk group (see Section 5.2.D for a detailed description). A PRI is required to utilize Sprint features that are compatible with the ISDN. ISDN uses a set of technical protocols jointly developed by the international telecommunications industry.

The PRI arranges channels within the DS 1 signal into B channels and D channels. The B channel is a 64 Kbps digital path capable of transporting voice and data. The B channel may be connected to any one, or combination, of the Sprint services listed above. The subscriber must specify which of the available services or combination of services is to be carried on the PRI B channels before PRI access is made available. Call-by-Call Service Access allows one or more B channels within a PRI to be shared among services operating on that PRI. The D channel carries the signaling, control and user data associated with the corresponding B channels. ISDN compatible equipment must be obtained by the subscriber to provide control of ISDN services and control the sharing of B channels on Call-by-Call Service Access.

The PRI supported on the Sprint network conforms to Northern Telecom PRI Specification No. NIS-A211-4. Customer Premise Equipment (CPE) which is compatible with this specification can be connected to the Sprint ISDN network. CPE which is not compatible with this specification will require the use of a protocol converter to convert the PRI format to the Northern Telecom version. T-1 access is required to obtain ISDN PRI access service and is provided for under Sprint Schedule No. 8.

---

7. DOMESTIC ISDN PRIMARY RATE INTERFACE (PRI) (Continued)

2. ISDN Features

The following ISDN features are available with the appropriate associated Sprint service:

1. Call-by-Call Service Access

Call-by-Call Service Access allows one or more B channels within a PRI to be shared between services operating on the PRI. The D channel carries the signaling, control and user data associated with the corresponding B channels. ISDN compatible equipment must be obtained by the subscriber to provide control of ISDN services and control the sharing of B channels on Call-by-Call Service Access. Call-by-Call Service Access allows the sharing of Ultra WATS, Ultra 800, and VPN services on the same PRI trunk group.

For calls (e.g., Ultra WATS, VPN) which originate on a PRI trunk group through a PBX, the PBX will identify to the Sprint network the type of call which is being requested. The Sprint network will use this information to process and bill the call.

For calls which terminate to the PRI trunk group (e.g., VPN and Ultra 800), the Sprint network will derive the call type based on the dialed number and transmit the call type to the PBX.

With the initial implementation of ISDN service, the Sprint switch will allow any of the ISDN services which were ordered to originate or terminate to any trunk within the ISDN trunk group.

2. Ultra WATS/Ultra 800 Calling Number Identification Service

Can be found in Sprint's Schedule No. 2.

3. Virtual Private Network (VPN) Feature Interworking

Can be found in Sprint's Schedule No. 5.

---

7. DOMESTIC ISDN PRIMARY RATE INTERFACE (PRI) (Continued)

2. ISDN Features (Continued)

4. Back Up Channel D Capability

Back Up Channel D Capability supplies an additional standby or diverse control channel for customer to network ISDN signalling. It adds additional protection in the event of a primary control failure. Backup D channels are supplied through the use of multiple 23 B and D configured PRI access facilities. This feature provides the capability to have a second D Channel associated with a PRI trunk group.

In terms of performance, the second D channel is identical to the first D channel. When both D channels are in service, one of the D channels is in the active state (processing signalling messages), and one is in the standby state. If the active D channel fails or malfunctions for any reason, then the DMS-250 will switch the standby D channel to the active state. When the standby D channel becomes active, all active calls in progress are maintained. This feature is available with the following Sprint services: Ultra 800, Ultra WATS, Clearline switched services and VPN services.

7. DOMESTIC ISDN PRIMARY RATE INTERFACE (PRI) (Continued)3. Service Components and Rates

All charges (for example, usage, installation, monthly recurring) associated with the non-ISDN version of services (example: Ultra WATS, Ultra 800, VPN, Clearline) will apply to the ISDN versions of these services in addition to the rates listed below:

<u>Component</u>	<u>Monthly Recurring Charge</u>	<u>Installation Charge</u>
ISDN PRI D Channel	\$400.00	\$2,000.00 per channel
Back Up Channel D	\$100.00	\$2,000.00 per channel
Call-by-Call Service Access	N/A	\$0.00 per PRI
New Service/Add-ons Establish New Trunk Group	N/A	\$0.00 per occurrence
Rearrange/Change Trunk Group After Initial Installation	N/A	\$0.00 per occurrence

8. CONTRACTUAL ARRANGEMENTS1. Description

This section contains general information for Clearline services provided under contractual arrangements with customers. These services are provided over routes and facilities agreed upon between Sprint and the customer to meet the customer's network requirements.

The Monthly Recurring Charges ("MRC") for contractual arrangements will be in effect for the term specified below. Non-Recurring Charges ("NRC") as applicable are also specified. For international circuits, the MRC is for either the half-circuit charge or the full-circuit charge. If an ID Number begins with the letter "F", the rates associated with the ID Number are full circuit rates. The rates include applicable local access. The length of the term is in months. A term of 1 month indicates the circuit is provided on a month-to-month basis.

At the end of the term, the Clearline services will continue to be billed at the contractual arrangement rate until the customer either upgrades, cancels or signs a new contract, or until Sprint gives the customer notice that the rates will no longer be in effect.

The rates specified below will be in effect for 29 days following the effective date of the schedule, unless otherwise noted. An asterisk (\*) indicates the rates, terms and conditions in the contractual arrangement are no longer available for additional customer enrollment.
